

Name: OGUNOLA Taiwo

Work Schedule

I have study the problem and instructions well enough, I will be using Python High-level web framework, Django, in which in I will employ Django MVC patterns. My work schedule will be as follows:

- The Algorithm and mathematical analysis of the problem will be solved and sent before 6:00pm, June 22, 2019.
- Second report on the progress of the task will be sent on or before 6:00pm, June 24, 2019. This will contain the basic static HTML and CSS styling of the web application.
- The final report containing the complete solution to the problem will be submitted on or before June 26, 2019, 11:59pm.

Each of these will contain a README.md file and a complementing requirements.txt file for the Python application.
